
Garments Management System

Student ID:

1405072

1405075

1405079

1405086

1405087

Why is the system required?

**More than
5000
factories**

**4 million
workers**

**\$26 billion
a-year
industry**

**But,
Very few
management
system software
available.**

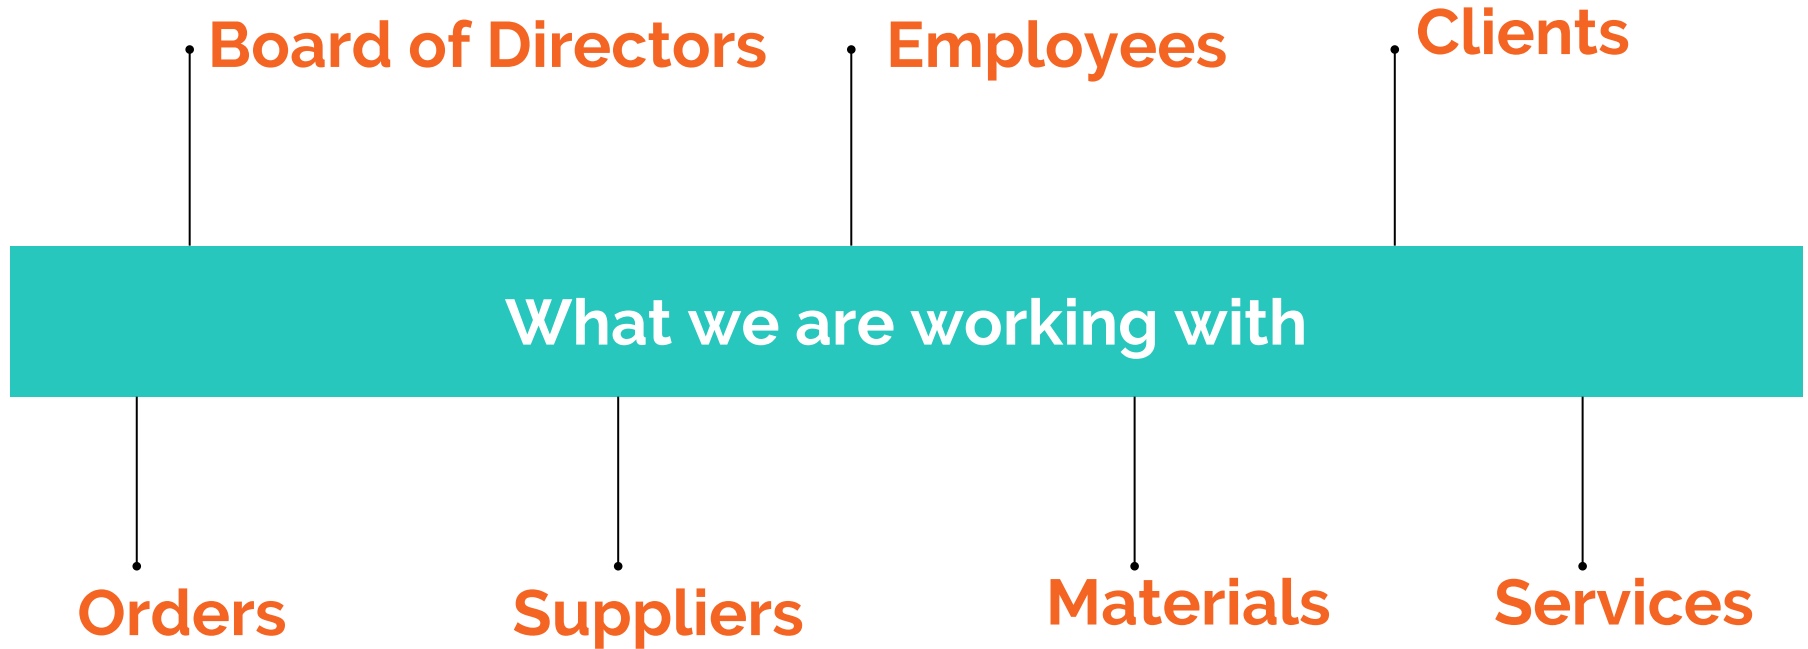

Garment System in Bangladesh

- ❑ Foreign buyers give orders to the garments.
- ❑ The garment management receives the order.
- ❑ Management distributes the work to its employees.
- ❑ After the completion of work, Tester checks the work.
- ❑ Finally shipment (delivery) is done.

We want to develop the software for this system according to this logical design.

The Management System Branches

Our System

→ Everything on a Database

Everything will be registered into the system.

→ Buyer-Owner Interactions

Our system will make it easier for owners to do business.

→ Product Ordering

Each of the order placed will be dynamically monitored and maintained by the system.

→ Delivery System

Managing the shipment of the products and materials.

→ Employee Management

With all the information of an employee in the database, the system will operate on the financial and human resource section.

Our System (Continued)

→ **Supplies Monitoring**

System checks everything related to material supplies and service supplies.

→ **Saving Finance Information**

Our system will have a section for the owners to manage the economic side. It will feature the billings, tax payments, loans etc.

→ **Services**

Every utility service used by a garment factory will be managed by the system.
Like Security Services, Machinery Services etc.

→ **Order Progress Tracking**

The orders that are in place will be tracked and checked. Our system will monitor the current states of every orders.

What is not included

→ Online Money Transaction

The System will not handle any kind of transaction.

→ Financial Decisions

The system will hold financial records and statistics. But it will not calculate the financial facts.

→ Stock Market Analysis

We will not include stock market transactions, stock values etc.

—

Let's make the Garment Industry of Bangladesh great (and **digital**) again!

Thank You.
